

# 9.1" Two Stage WaterJet

## Key Benefits - Two Stage Axial Flow with Trim

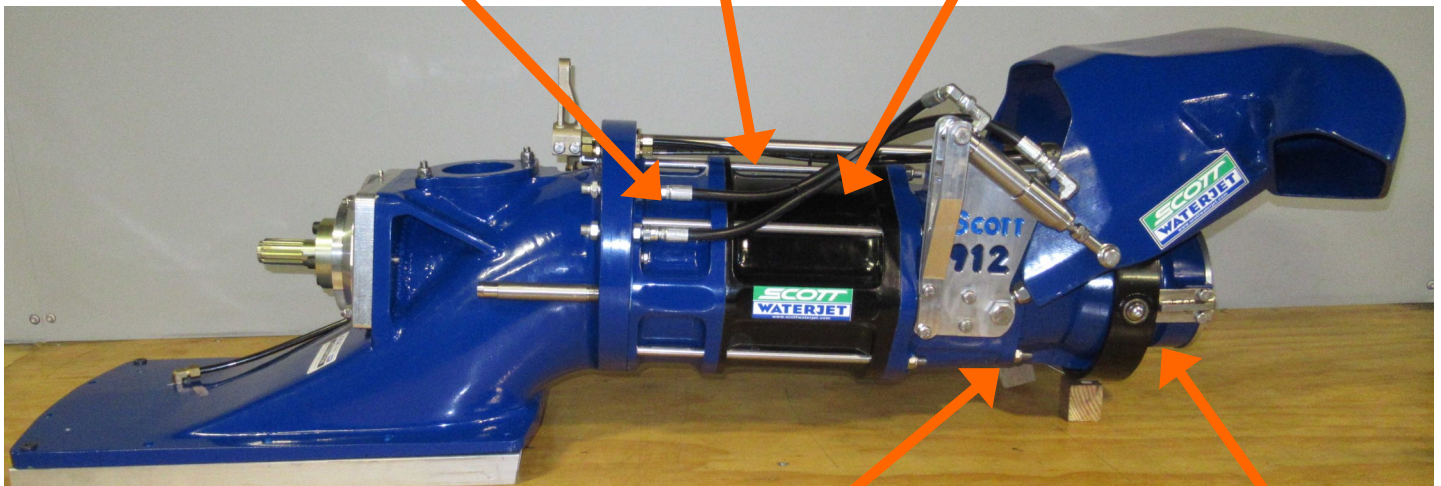

- Twice The impellor Area** > Twice the Grip
- Greater internal Volume** > The rear Impellor remains primed even in the most serious white water allowing the pump to stay hooked up delivering Outstanding Grip and Control.
- Full Range Performance** > The two stage has a unique ability to provide outstanding performance through the entire RPM range without Compromise.
- Dual Wheels** > A Two Stage is like a Pickup with Dual Wheels. It will carry More Load and provide Twice the Grip.
- Fingertip Trim Control** > High Two Stage Water Flow with Trim delivers significant advantages for all types of Jet Boating.
- Longer Jet Unit** > Greater Leverage providing Better Steering and Trim Control/Response.
